The Liver

## 'Heal your LIVER – and return to Health!'

"90% of the people have poor  
liver function, and don't know it.'

Liver problems can lead to: overweight, fatigue, insomnia,  
skin problems, vision problems, varicose veins, arthritis, back  
pain, and even heart problems and diabetes.

A powerful, old formula that can  
help the liver.

Dear Friend,

If your liver were 100% healthy, you would hardly be  
sick a day in your life. That's a fact.

Your liver is a filter -- a LIVING filter. It filters the  
toxins and poisons out of your blood and keeps it clean.  
Clean blood means a disease-free body. The liver is the  
main detoxifying gland in the body. Many health problems  
can be traced back to a poor liver, yet few know it

**'One woman purified her liver and lost 15 pounds with  
zero change in her diet.'**

As people get older, their livers start to harden. It gets  
plugged with fats. It can't filter the blood efficiently.  
Poisons start to accumulate. That's when you get sick. A  
poor liver is the Road to Old Age. One brilliant medical  
doctor called a bad liver -- the *Porta Malorum*: The  
Gateway to Disease.

#### Healing Cancer by Healing the liver.

A medical expert on the Liver, Dr. Kasper Blond, was  
100% certain that a toxic liver was the #1 cause of cancer.  
But he went further. He also believed that spontaneous  
cures of cancer could occur, provided regeneration of the  
liver took place. Tumors feed on toxins, and the liver  
removes the toxins. Very simple.

Lung Cancer: 'A smoker with a healthy liver will hardly  
become a victim of lung cancer. This solves the riddle of  
why many heavy smokers *never* get lung cancer.'

People change their oil filter in their  
car every 3,000 miles.

But when their liver - which is also a  
filter, gets clogged, they never  
cleanse it.

Note: For the treatment of any health problem, see your doctor.
